

SAHIL SAMEER SIDDIQUE

Software Developer | Full Stack Developer

Delhi, India | +91-7701913282 | sahilsameer.dev18@gmail.com

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Developer building production-ready web applications with React.js and Node.js, including AI-integrated features using the Gemini API. Experienced with REST APIs, JWT authentication, and both SQL and NoSQL databases (PostgreSQL, MongoDB). Built and deployed platforms like PrepStack and SkillBridge, focusing on automation, secure authentication, and performance optimization.

TECHNICAL SKILLS

Programming Languages: JavaScript, C++

Frontend: React.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, Socket.IO, Zod, REST APIs, JWT Auth

Databases: MongoDB, PostgreSQL, Redis, Prisma ORM

Tools & Deployment: Git, GitHub, Postman, Vercel, Render

PROJECTS

PrepStack - SDE Preparation Platform | [Live](#)

Tech Stack: React.js, Node.js, MongoDB, Gemini API

- Built a full-stack SDE prep platform integrating DSA progress tracking and interview prep resources, reducing AI project ideation time from hours to under **20** seconds.
- Implemented secure authentication with JWT refresh-token rotation and Google OAuth 2.0, including account-linking, to secure user sessions.
- Reduced initial bundle size by **31%** using route-based code splitting with React lazy loading, improving overall load performance.
- Added Redis-backed rate limiting and centralized error handling to keep the API secure.

SkillBridge - AI Skill Gap Analyzer | [Live](#)

Tech Stack: React.js, Node.js, PostgreSQL (Neon), Prisma ORM, Gemini API

- Developed an AI-powered resume analysis system that compares resumes against job descriptions to generate structured interview reports.
- Engineered a skill-matching engine using aliases with fuzzy matching fallback to map AI-generated skill gaps with curated learning resources.
- Secured backend with Redis-backed token blacklisting, rate limiting, and HTTP-only JWT cookie sessions across Google OAuth 2.0 and credential-based auth.

SyncTube - Real-Time Watch Party Platform | [Live](#)

Tech Stack: React.js, Node.js, Socket.IO, Express.js

- Built a real-time YouTube video sync platform using Socket.IO, synchronizing playback across multiple clients with under **1.5s** drift correction.
- Prevented playback sync loops using a ref-based guard between YouTube API and Socket.IO events.
- Implemented server-side RBAC with automatic host transfer for secure playback and admin controls.

EDUCATION

Bachelor of Technology in Computer Science & Engineering

International Institute of Technology and Management, Sonipat | 2021 – 2025

XII (Senior Secondary)

Dr. Zakir Hussain High School, Patna | BSEB | 2018 – 2020
