PERSONAL PROJECTS

PrepStack – SDE Preparation Platform | [Live](#)

Tech Stack: React.js, Node.js, MongoDB, Gemini API

- Developed a full-stack SDE preparation platform consolidating DSA tracking, AI project idea generation, CS notes, and resume guide.
- Integrated Gemini API to generate role-specific project ideas, reducing project ideation from hours of manual research to under **30** seconds.
- Engineered **14+** RESTful API endpoints with JWT auth and refresh token securing all user-specific routes.
- Optimized load performance with route-level **lazy loading** across **8+** components cutting initial bundle weight.

SkillBridge – AI Career Gap Analyzer | [Live](#)

Tech Stack: React.js, Node.js, MongoDB, Gemini API

- Engineered a full-stack AI-powered career gap analysis platform that evaluates resumes against job descriptions to identify skill gaps.
- Generated report includes **10+** role specific technical and behavioural interview questions, skill gaps and a preparation roadmap.
- Implemented **JWT** authentication securing all report generation and dashboard routes.

Safar AI – AI Travel Planner | [Live](#)

Tech Stack: React.js, Tailwind CSS, Gemini API, Google Places API

- Developed an AI-powered travel planner that generates personalized itineraries in under **20** seconds using Gemini API.
- Automated hotel recommendations, route planning, and map-based navigation using Google Places API.
- Structured the frontend with React.js and Tailwind CSS for a consistent, mobile-first design.
